

Dear Parent/Guardian,

Join us in welcoming your son or daughter to **Lexia Reading**[™] – an exciting, fun software program that provides the individualized, targeted practice students need to master their reading skills! Our school has implemented the **Lexia Reading** software program to support our core curriculum in reading and language arts. Your son or daughter may be in one of these three programs:

Lexia Early Reading[®]
Lexia Primary Reading[®]
Lexia Strategies for Older Students[®]

Here's how this award-winning, computer-based reading program works:

- Your son or daughter's teacher will prescribe a selected series of activities from **Lexia Reading** based on your son or daughter's individual reading needs.
- Students will spend time several days per week working on a **Lexia Reading** program.
- **Lexia Reading** automatically paces each student by providing reinforcement activities when they need additional time on task. Students practice, apply and proceed with the skills they have mastered.
- **Lexia Reading** focuses on critical reading skills that have been identified by national reading experts.
- Various levels of activities provide extensive practice in everything from basic phonological awareness to advanced word-attack strategies and vocabulary development based on Greek and Latin word roots.
- As your son or daughter systematically progresses through the software, he or she will gain a sense of achievement, confidence, and independence.

Lexia Reading has helped thousands of students across the United States to develop fundamental reading skills, in a fun and dynamic way. Our school is making the commitment to make this a part of your student's reading curriculum – please share in our excitement!

Enjoy participating in your son or daughter's reading growth and success!

Best wishes,
